

## Discovery Science General and Emotional Cognition

**IntegNeuro™** – a touchscreen based battery for assessing general and emotional cognition, validated against traditional paper-and-pencil tests and with established reliability, cross-cultural consistency and norms.

**WebNeuro™** A web-based version of the assessment that has been validated against IntegNeuro.

These domains provide disorder-specific assessments. E.g. correspond to the domains of MATRICS MCCB for schizophrenia. Equivalent parallel forms of the test are available for repeat testing. Paediatric versions are also available.

### Measures Available:

#### **IntegNeuro™**

##### *Thinking*

- Motor Tapping
- Choice Reaction Time
- Verbal Memory Recall (including delayed conditions)
- Span of Visual Memory
- Digit Span (Forwards and Reverse)
- Verbal Interference (Parts 1 & 2)
- Switching of Attention (Parts 1 & 2)
- Maze
- Go/NoGo
- Continuous Performance Test (n-back)
- Time Estimation
- Spot The Real Word
- Word Generation

##### *Emotion*

- Emotion Identification (explicit)
- Emotion Recognition (implicit, delayed)

#### **WebNeuro™**

##### *Thinking*

- Motor Tapping
- Choice Reaction Time
- Verbal Memory Recognition (including delayed conditions)
- Span of Visual Memory
- Digit Span
- Verbal Interference (Parts 1 & 2)
- Switching of Attention (Parts 1 & 2)
- Maze
- Go/NoGo
- Continuous Performance Test (n-back)

##### *Emotion*

- Emotion Identification (explicit)
- Emotion Recognition (implicit, delayed)
