

Brain Resource for Pharmaceutical Trials

Brain Resource Pharmaceutical Trials Products consist of 4 Primary Offerings:

1. The MATRICS Initiative

IntegNeuro provides a comparable and validated computerized assessment for any Schizophrenia Pharmaceutical Trial.

2. Risk Assessment for Convulsions

Brain Resource has a psychophysiological brain and body (EEG, ERP, SCL, HRV) battery to proactively screen for possible convulsive risk, in any early phase pharmaceutical trial, for any compound.

3. iSPOT

Brain Resource is currently selecting pharmaceutical companies (and biotechnology companies) that are focused on “Personalized Medicine” to collaborate on the outcomes of this largest international Biomarker study in Depression and ADHD.

**iSPOT: 20 sites, over 5 countries joined in one vision:
to personalize the way we treat Depression & ADHD**

4. Brain Resource Integrative Platform for New Drug Discovery

Brain Resource has the World’s Largest Standardized and Integrative Brain Database and methodology for discovering new drugs from a holistic brain vantage point.

**Click on hyperlinks 1-4 for further details.*
